Restore and Maintain Bristol Bay Science and Research Institute Watershed Projects												
	Inc	800.0	450.0	14.8	275.2	60.0	0.0	0.0	0.0	0	0	0
1004 Gen Fund 800.0												
During the FY2022 budget cycle, the fund source for many of the Bristol Bay projects was changed from statutory designated program receipts to general fund. The temporary increment was designated for FY2022 – FY2023. These projects are continuing, and general fund authority is needed in FY2024 to support these mission critical projects. Discontinuing these projects would negatively impact the management and assessment projects of the Bristol Bay fisheries resulting in more conservative management.												
Alaska Department of Fish & Game/Bristol Bay Science and Research Institute projects include: Nushagak Sonar, June 1-July 30 Port Moller Kvichak In-river Test Fish Test Fish Coordinator (Fish Biologist 2) Egegik In-river Test Fish Ugashik In-river Test Fish Alagnak Tower Tower Extensions

1109 Test Fish	-	1,000.0										
----------------	---	---------	--	--	--	--	--	--	--	--	--	--

Bering Sea crab fisheries typically generate over \$200 million in annual ex-vessel value but are in rapid decline. Non-general fund sources currently provide about 85 percent of all personnel funding for programs supporting these fisheries. These funds are expected to decline by upwards of 50 percent in the next one to three years.

Bristol Bay red king crab (BBRKC) abundance has been in decline and the fishery closed in 2021 due to conservation concerns. The fishery will remain closed for 2022. Closure of the BBRKC fishery does not preclude the annual test fish (TF) cost recovery, however it is foreseeable that test fishery removals will no longer be practical at current levels as the stock continues to decline. Shifting TF cost recovery to Bering Sea snow crab is also not viable. The snow crab stock unexpectedly collapsed in 2020 and is now considered overfished and may close to commercial fishing under a developing federal rebuilding plan. Beginning in FY2024, Bering Sea/Aleutian Island test fish options will be limited, and the target revenue goal will need to be substantially lowered to accommodate conservation and stock rebuilding plan recommendations. Limited carryforward is currently available but will be mostly depleted after one fiscal year should TF cost recovery not occur.

For comparison, state general funds were the largest contributor to FY2014 personnel costs. Returning to the historical funding distribution where the TF and crab rationalization projects represented 23 percent and 11 percent respectively relative to FY2023 personnel costs would require \$1,000.0 in replacement funds. These funds would serve as a bridge and stabilize staffing until fishery specific funding opportunities rebound.

Below are historical revenues of test fishery receipts:
FY2019 \$1,300.0 in revenue with \$1,300.0 authority
FY2020 \$1,300.0 in revenue with \$1,300.0 authority
FY2021 \$1,200.0 in revenue with \$1,300.0 authority
FY2022 \$1,000.0 in revenue with \$1,300.0 authority

The Office of Information Technology (OIT) is a centralized agency responsible for providing digital security and technological infrastructure to support the business needs of the State. The cost of various IT services provided by OIT has inflated over the past three years, and the increases can no longer be absorbed within the existing budget. The unanticipated cost increases and a list of the services that will be discontinued are summarized below.

Unanticipated costs:

Azure Security Logging - \$1,000.0

- During FY21 the previous logging infrastructure failed within SOA. Logging is critical for cybersecurity defense and forensic analysis.
- Other qualified logging solutions would have required significant capital investment and extended implementation timelines.

Mainframe Budget - \$1,000.0

Change Record Detail - Multiple Scenarios with Descriptions (294)

RDU: Commercial Fisheries (143)

Scenario/Change Record Title	Trans Type	Totals	Personal Services	Travel	Services	Commodities	Capital Outlay	Grants, Benefits	Miscellaneous	Positions		
										PFT	PPT	NP
<ul style="list-style-type: none">• In FY19/FY20 OIT made several mainframe optimizations in anticipation of departments retiring their use of the mainframe. Cost optimization goals were not achieved resulting in expenses remaining relatively flat while revenues have been decreasing. As departments quit leveraging the mainframe, mainframe costs do not decrease resulting in departments paying less than the actual cost of the mainframe. The original planned budget was formulated under the understanding that cost optimizations were going to be achieved. Mainframe rates and budget authorization need to be increased to reflect the real cost of performing business.												
Microsoft Licensing - \$1,184.0												
<ul style="list-style-type: none">• Employee and contractor growth across SOA increased resulting in 831 additional licenses required for purchase.• Elevated account privileges were implemented for enhanced security.												
Azure Connectivity - \$301.0												
<ul style="list-style-type: none">• Moving applications to the Azure cloud resulted in SOA establishing a connection directly to the cloud for enhanced performance and security.												
Red Hat Directory Server - \$50.0												
<ul style="list-style-type: none">• This product used to be a freeware and is converting to a pay for use model. Once this occurs, OIT will be unable to leverage this tool unless paid for.												
Commissioner and Admin Chargeback - \$265.3												
The Department of Fish & Game has distributed this adjustment across the department based on department's cost allocation plan.

1201 CFEC Rcpts		3.5										

The Office of Information Technology (OIT) is a centralized agency responsible for providing digital security and technological infrastructure to support the business needs of the State. Every year portions of critical infrastructure become unsupportable as they reach the end of their lifespan. OIT maintains a regular schedule to replace this equipment in phases to eliminate the need for large one-time capital projects and stabilize the annual budget. Shifting priorities have forced OIT to defer high-priority maintenance and upkeep on State owned hardware and technological infrastructure. These delays are beginning to catch up with the agency and further delays could have dire consequences for the State, including increased maintenance and support expenditures, security vulnerabilities, and statewide network/systems failure. The following critical activities include:

- Network equipment upgrades/renewals (Meraki, wireless, routers, switches firewalls)
- Battery replacements for equipment requiring alternative power source in the event of primary power failure
- PC upgrades for OIT employees with aging/unsupportable equipment This change will be allocated across the department's programs in accordance with the department's approved cost allocation processes.

The Department of Fish & Game has distributed this adjustment across the department based on department's cost allocation plan.

1201 CFEC Rcpts		1.3										

In FY2022, the Division of Personnel (DOP) acquired the platform branded AspireAlaska to provide essential training opportunities for remote workers as a response to the global pandemic. This platform is Cornerstone on Demand (CSOD) and its reseller SHI (from the NASPO value point site) and has 3 modules:

1. Learning (user access to the Learning side of the system)
2. Performance (user access to the new Performance Management Learning and Development forms and processes)
3. Cornerstone Content Anytime (CCA) with a library of 1,972 various courses

AspireAlaska as a training platform and learning library was very successful, and this increment for license and system costs will extend the contract indefinitely, expand user access to include the legislature and essential contractors, and add the performance management and evaluation side of the Cornerstone platform.

The Department of Fish & Game has distributed this adjustment across the department based on department's cost allocation plan.

1201 CFEC Rcpts		1.6										

This increment provides for a quarterly container delivery of updates for the Integrated Resource Information System (IRIS) 4.0, as well as increased authority for costs of providing ALDER reporting support to departments and the new unlimited license agreement with Oracle necessary for the IRIS upgrade and data warehouse upgrade. Finally, this increase is necessary to address an audit finding related to IRIS functionality.

The upgrade from IRIS 3.9 to IRIS Advanced 4.0 improves the system's user interface and adds new features. This funding allows for ongoing updates to be made on a quarterly basis avoiding the need for expensive, multi-year upgrade projects which have occupied significant State time and resources in the past. The State will receive new code updates, patch sets, additional features and new functionality with each quarterly update. New features coming in FY2023 include additional e-procurement functionality, lease and debt functionality, vendor performance analytics and risk metrics, Human Resource Analytics, Reimbursable Service Agreement process enhancements, Accounts Receivable intercept, collection and write-off functions, cost accounting fund source controls and additional robotic process automation.

The State has made a significant investment in IRIS and, as the system is modernized and tasks are automated, the State will save time and increase efficiencies across all departments. This project will ultimately lead to more accurate accounting and fewer audit findings, resulting in increased accountability and transparency.

The Department of Fish & Game has distributed this adjustment across the department based on department's cost allocation plan.

Consolidate Division of Commercial Fisheries Regional Components												
Misadj		0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0	0	0
The current organizational structure in the Division of Commercial Fisheries will be consolidated. The new structure will combine the five regional management components (Southeast, Central, Arctic-Yukon-Kuskokwim (AYK), Westward, Statewide) into one component. The Commercial Fisheries Entry Commission will remain a separate component within the Commercial Fisheries Results Delivery Unit (RDU). Reducing the number of components provides administrative process efficiencies by streamlining budget and accounting structures. The regional management structure will remain the same. This structure change brings the Commercial Fisheries RDU in line with other divisions within the department.

1201 CFEC Rcpts		6.6										

The Office of Information Technology (OIT) is a centralized agency responsible for providing digital security and technological infrastructure to support the business needs of the State. The cost of various IT services provided by OIT has inflated over the past three years, and the increases can no longer be absorbed within the existing budget. The unanticipated cost increases and a list of the services that will be discontinued are summarized below.

Unanticipated costs:

Azure Security Logging - \$1,000.0

- During FY21 the previous logging infrastructure failed within SOA. Logging is critical for cybersecurity defense and forensic analysis.
- Other qualified logging solutions would have required significant capital investment and extended implementation timelines.

Mainframe Budget - \$1,000.0

- In FY19/FY20 OIT made several mainframe optimizations in anticipation of departments retiring their use of the mainframe. Cost optimization goals were not achieved resulting in expenses remaining relatively flat while revenues have been decreasing. As departments quit leveraging the mainframe, mainframe costs do not decrease resulting in departments paying less than the actual cost of the mainframe. The original planned budget was formulated under the understanding that cost optimizations were going to be achieved. Mainframe rates and budget authorization need to be increased to reflect the real cost of performing business.

Microsoft Licensing - \$1,184.0

- Employee and contractor growth across SOA increased resulting in 831 additional licenses required for purchase.
- Elevated account privileges were implemented for enhanced security.

Azure Connectivity - \$301.0

- Moving applications to the Azure cloud resulted in SOA establishing a connection directly to the cloud for enhanced performance and security.

Red Hat Directory Server - \$50.0

- This product used to be a freeware and is converting to a pay for use model. Once this occurs, OIT will be unable to leverage this tool unless paid for.

FY2023 Office of Information Technology Core Services Rate Infrastructure Upkeep Increase

	Unalloc	3.0	0.0	0.0	3.0	0.0	0.0	0.0	0.0	0	0	0
1201 CFEC Rcpts		3.0										

The Office of Information Technology (OIT) is a centralized agency responsible for providing digital security and technological infrastructure to support the business needs of the State. Every year portions of critical infrastructure become unsupportable as they reach the end of their lifespan. OIT maintains a regular schedule to replace this equipment in phases to eliminate the need for large one-time capital projects and stabilize the annual budget. Shifting priorities have forced OIT to defer high-priority maintenance and upkeep on State owned hardware and technological infrastructure. These delays are beginning to catch up with the agency and further delays could have dire consequences for the State, including increased maintenance and support expenditures, security vulnerabilities, and statewide network/systems failure. The following critical activities include:

- Network equipment upgrades/renewals (Meraki, wireless, routers, switches firewalls)
- Battery replacements for equipment requiring alternative power source in the event of primary power failure
- PC upgrades for OIT employees with aging/unsupportable equipmentThis change will be allocated across the department's programs in accordance with the department's approved cost allocation processes.

The Department of Fish & Game has distributed this adjustment across the department based on department's cost allocation plan.

FY2023 Human Resources Rate AspireAlaska

	Unalloc	0.7	0.0	0.0	0.7	0.0	0.0	0.0	0.0	0	0	0
1201 CFEC Rcpts		0.7										

In FY2022, the Division of Personnel (DOP) acquired the platform branded AspireAlaska to provide essential training opportunities for remote workers as a response to the global pandemic. This platform is Cornerstone on Demand (CSOD) and its reseller SHI (from the NASPO value point site) and has 3 modules:

1. Learning (user access to the Learning side of the system)
2. Performance (user access to the new Performance Management Learning and Development forms and processes)
3. Cornerstone Content Anytime (CCA) with a library of 1,972 various courses

FY2023 Administrative Systems Upgrade Ongoing Cost Increases

	Unalloc	0.7	0.0	0.0	0.7	0.0	0.0	0.0	0.0	0	0	0
1201 CFEC Rcpts		0.7										

This increment provides for a quarterly container delivery of updates for the Integrated Resource Information System (IRIS) 4.0, as well as increased authority for costs of providing ALDER reporting support to departments and the new unlimited license agreement with Oracle necessary for the IRIS upgrade and data warehouse upgrade. Finally, this increase is necessary to address an audit finding related to IRIS functionality.

The upgrade from IRIS 3.9 to IRIS Advanced 4.0 improves the system's user interface and adds new features. This funding allows for ongoing updates to be made on a quarterly basis avoiding the need for expensive, multi-year upgrade projects which have occupied significant State time and resources in the past. The State will receive new code updates, patch sets, additional features and new functionality with each quarterly update. New features coming in FY2023 include additional e-procurement functionality, lease and debt functionality, vendor performance analytics and risk metrics, Human Resource Analytics, Reimbursable Service Agreement process enhancements, Accounts Receivable intercept, collection and write-off functions, cost accounting fund source controls and additional robotic process automation.

The State has made a significant investment in IRIS and, as the system is modernized and tasks are automated, the State will save time and increase efficiencies across all departments. This project will ultimately lead to more accurate accounting and fewer audit findings, resulting in increased accountability and transparency.

The Department of Fish & Game has distributed this adjustment across the department based on department's cost allocation plan.

Additional authority in the Fish and Game Fund is needed to restore funding to key programs that were reduced and/or eliminated during the pandemic (primarily king and coho salmon research) due to reduced license revenues. Restoring authority will improve the Division's ability to collect critical data to inform personnel responsible for taking management actions.

FY2023 Administrative Systems Upgrade Ongoing Cost Increases

	Unalloc	13.7	0.0	0.0	13.7	0.0	0.0	0.0	0.0	0	0	0
1004 Gen Fund		13.7										

This increment provides for a quarterly container delivery of updates for the Integrated Resource Information System (IRIS) 4.0, as well as increased authority for costs of providing ALDER reporting support to departments and the new unlimited license agreement with Oracle necessary for the IRIS upgrade and data warehouse upgrade. Finally, this increase is necessary to address an audit finding related to IRIS functionality.

The upgrade from IRIS 3.9 to IRIS Advanced 4.0 improves the system's user interface and adds new features. This funding allows for ongoing updates to be made on a quarterly basis avoiding the need for expensive, multi-year upgrade projects which have occupied significant State time and resources in the past. The State will receive new code updates, patch sets, additional features and new functionality with each quarterly update. New features coming in FY2023 include additional e-procurement functionality, lease and debt functionality, vendor performance analytics and risk metrics, Human Resource Analytics, Reimbursable Service Agreement process enhancements, Accounts Receivable intercept, collection and write-off functions, cost accounting fund source controls and additional robotic process automation.

The State has made a significant investment in IRIS and, as the system is modernized and tasks are automated, the State will save time and increase efficiencies across all departments. This project will ultimately lead to more accurate accounting and fewer audit findings, resulting in increased accountability and transparency.

The Department of Fish & Game has distributed this adjustment across the department based on department's cost allocation plan.

FY2023 Administrative Systems Rate Adjusted Base Change

	Unalloc	-1.1	0.0	0.0	-1.1	0.0	0.0	0.0	0.0	0	0	0
1004 Gen Fund		-1.1										

In FY2023 the Department of Fish and Game received an unallocated rates adjustment for Administrative Systems Rate Adjustment Base Change.

The Department of Fish & Game has distributed this adjustment across the department based on its cost allocation plan.

FY2023 Office of Information Technology Core Services Rate Software Increases

	Unalloc	17.5	0.0	0.0	17.5	0.0	0.0	0.0	0.0	0	0	0
1024 Fish/Game		17.5										

The Office of Information Technology (OIT) is a centralized agency responsible for providing digital security and technological infrastructure to support the business needs of the State. The cost of various IT services provided by OIT has inflated over the past three years, and the increases can no longer be absorbed within the existing budget. The unanticipated cost increases and a list of the services that will be discontinued are summarized below.

Unanticipated costs:

Azure Security Logging - \$1,000.0

• During FY21 the previous logging infrastructure failed within SOA. Logging is critical for cybersecurity defense and forensic analysis.

Change Record Detail - Multiple Scenarios with Descriptions (294)

Department of Fish and Game

Component: Wildlife Conservation (473)

RDU: Wildlife Conservation (147)

Scenario/Change Record Title	Trans Type	Totals	Personal Services	Travel	Services	Commodities	Capital Outlay	Grants, Benefits	Miscellaneous	Positions		
										PFT	PPT	NP

• Other qualified logging solutions would have required significant capital investment and extended implementation timelines.

Mainframe Budget - \$1,000.0

• In FY19/FY20 OIT made several mainframe optimizations in anticipation of departments retiring their use of the mainframe. Cost optimization goals were not achieved resulting in expenses remaining relatively flat while revenues have been decreasing. As departments quit leveraging the mainframe, mainframe costs do not decrease resulting in departments paying less than the actual cost of the mainframe. The original planned budget was formulated under the understanding that cost optimizations were going to be achieved. Mainframe rates and budget authorization need to be increased to reflect the real cost of performing business.

Microsoft Licensing - \$1,184.0

• Employee and contractor growth across SOA increased resulting in 831 additional licenses required for purchase.
• Elevated account privileges were implemented for enhanced security.

Azure Connectivity - \$301.0

• Moving applications to the Azure cloud resulted in SOA establishing a connection directly to the cloud for enhanced performance and security.

Red Hat Directory Server - \$50.0

• This product used to be a freeware and is converting to a pay for use model. Once this occurs, OIT will be unable to leverage this tool unless paid for.

Commissioner and Admin Chargeback - \$265.3

The Department of Fish & Game has distributed this adjustment across the department based on department's cost allocation plan.

- In FY19/FY20 OIT made several mainframe optimizations in anticipation of departments retiring their use of the mainframe. Cost optimization goals were not achieved resulting in expenses remaining relatively flat while revenues have been decreasing. As departments quit leveraging the mainframe, mainframe costs

										PFT	PPT	NP

do not decrease resulting in departments paying less than the actual cost of the mainframe. The original planned budget was formulated under the understanding that cost optimizations were going to be achieved. Mainframe rates and budget authorization need to be increased to reflect the real cost of performing business.

Microsoft Licensing - \$1,184.0

- Employee and contractor growth across SOA increased resulting in 831 additional licenses required for purchase.
- Elevated account privileges were implemented for enhanced security.

Azure Connectivity - \$301.0

- Moving applications to the Azure cloud resulted in SOA establishing a connection directly to the cloud for enhanced performance and security.

Red Hat Directory Server - \$50.0

- This product used to be a freeware and is converting to a pay for use model. Once this occurs, OIT will be unable to leverage this tool unless paid for.

Commissioner and Admin Chargeback - \$265.3

The Department of Fish & Game has distributed this adjustment across the department based on department's cost allocation plan.

FY2023 Office of Information Technology Core Services Rate Infrastructure Upkeep Increase

Unalloc	116.1	0.0	0.0	116.1	0.0	0.0	0.0	0.0	0	0	0

1061 CIP Rcpts	2.9										
1108 Stat Desig	3.4										

The Office of Information Technology (OIT) is a centralized agency responsible for providing digital security and technological infrastructure to support the business needs of the State. Every year portions of critical infrastructure become unsupportable as they reach the end of their lifespan. OIT maintains a regular schedule to replace this equipment in phases to eliminate the need for large one-time capital projects and stabilize the annual budget. Shifting priorities have forced OIT to defer high-priority maintenance and upkeep on State owned hardware and technological infrastructure. These delays are beginning to catch up with the agency and further delays could have dire consequences for the State, including increased maintenance and support expenditures, security vulnerabilities, and statewide network/systems failure. The following critical activities include:

- Network equipment upgrades/renewals (Meraki, wireless, routers, switches firewalls)
- Battery replacements for equipment requiring alternative power source in the event of primary power failure
- PC upgrades for OIT employees with aging/unsupportable equipment This change will be allocated across the department's programs in accordance with the department's approved cost allocation processes.

The Department of Fish & Game has distributed this adjustment across the department based on department's cost allocation plan.

1108 Stat Desig		1.1										

In FY2022, the Division of Personnel (DOP) acquired the platform branded AspireAlaska to provide essential training opportunities for remote workers as a response to the global pandemic. This platform is Cornerstone on Demand (CSOD) and its reseller SHI (from the NASPO value point site) and has 3 modules:

1. Learning (user access to the Learning side of the system)
2. Performance (user access to the new Performance Management Learning and Development forms and processes)
3. Cornerstone Content Anytime (CCA) with a library of 1,972 various courses

AspireAlaska as a training platform and learning library was very successful, and this increment for license and system costs will extend the contract indefinitely, expand user access to include the legislature and essential contractors, and add the performance management and evaluation side of the Cornerstone platform.

The Department of Fish & Game has distributed this adjustment across the department based on department's cost allocation plan.

FY2023 Human Resources Rate Adjusted Base Change

FY2023 Administrative Systems Upgrade Ongoing Cost Increases												
	Unalloc	35.7	0.0	0.0	35.7	0.0	0.0	0.0	0.0	0	0	0
1002 Fed Rcpts		29.3										
1007 I/A Rcpts		6.1										
1061 CIP Rcpts		0.3										

This increment provides for a quarterly container delivery of updates for the Integrated Resource Information System (IRIS) 4.0, as well as increased authority for costs of providing ALDER reporting support to departments and the new unlimited license agreement with Oracle necessary for the IRIS upgrade and data warehouse upgrade. Finally, this increase is necessary to address an audit finding related to IRIS functionality.

The upgrade from IRIS 3.9 to IRIS Advanced 4.0 improves the system's user interface and adds new features. This funding allows for ongoing updates to be made on a quarterly basis avoiding the need for expensive, multi-year upgrade projects which have occupied significant State time and resources in the past. The State will receive new code updates, patch sets, additional features and new functionality with each quarterly update. New features coming in FY2023 include additional e-procurement functionality, lease and debt functionality, vendor performance analytics and risk metrics, Human Resource Analytics, Reimbursable Service Agreement process enhancements, Accounts Receivable intercept, collection and write-off functions, cost accounting fund source controls and additional robotic process automation.

The State has made a significant investment in IRIS and, as the system is modernized and tasks are automated, the State will save time and increase efficiencies across all departments. This project will ultimately lead to more accurate accounting and fewer audit findings, resulting in increased accountability and transparency.

The Department of Fish & Game has distributed this adjustment across the department based on department's cost allocation plan.

<p>The Joint Board of Fisheries and Game is expected to meet in FY2024 to consider regulatory changes related to fish and game advisory committees, subsistence procedures, and non-subsistence areas. The meeting dates, duration, and location will be established by the boards during FY2023. The last time the Joint Board convened a meeting to address all of these topics was in FY2014. The meeting duration was five days, and the cost was approximately \$100.0. The Joint Board also met in FY2019 to only address advisory committee regulations and not the subsistence related regulations. The meeting was scheduled for five days, but it took only three days for the joint board to complete all business. The cost was approximately \$63.0.</p> <p>During FY2024, the Board of Game will address the Arctic, Western and Interior Regions and the Board of Fisheries will address finfish fisheries for the Cook Inlet and Kodiak areas.</p> <p>Additionally, Boards Support expects to renew a five-year capital project reimbursable services agreement with the Division of Wildlife Conservation which supports the advisory committee participation in the process for developing hunting and trapping regulations. If renewed, this will also help to offset some of the overall cost for advisory committee travel.</p>

In FY2023 the Department of Fish and Game received an unallocated rates adjustment for Office of Information Technology Other Non-Core Adjusted Base.												
The Department of Fish & Game has distributed this adjustment across the department based on its cost allocation plan.												
FY2023 Human Resources Rate AspireAlaska												
	Unalloc	1.2	0.0	0.0	1.2	0.0	0.0	0.0	0.0	0	0	0
1004 Gen Fund		1.2										
In FY2022, the Division of Personnel (DOP) acquired the platform branded AspireAlaska to provide essential training opportunities for remote workers as a response to the global pandemic. This platform is Cornerstone on Demand (CSOD) and its reseller SHI (from the NASPO value point site) and has 3 modules:												
1. Learning (user access to the Learning side of the system)												
2. Performance (user access to the new Performance Management Learning and Development forms and processes)												
3. Cornerstone Content Anytime (CCA) with a library of 1,972 various courses												
AspireAlaska as a training platform and learning library was very successful, and this increment for license and system costs will extend the contract indefinitely, expand user access to include the legislature and essential contractors, and add the performance management and evaluation side of the Cornerstone platform.												
The Department of Fish & Game has distributed this adjustment across the department based on department's cost allocation plan.

FY2023 Administrative Systems Upgrade Ongoing Cost Increases												
	Unalloc	1.4	0.0	0.0	1.4	0.0	0.0	0.0	0.0	0	0	0
1004 Gen Fund		1.4										
This increment provides for a quarterly container delivery of updates for the Integrated Resource Information System (IRIS) 4.0, as well as increased authority for costs of providing ALDER reporting support to departments and the new unlimited license agreement with Oracle necessary for the IRIS upgrade and data warehouse upgrade. Finally, this increase is necessary to address an audit finding related to IRIS functionality.												
The upgrade from IRIS 3.9 to IRIS Advanced 4.0 improves the system's user interface and adds new features. This funding allows for ongoing updates to be made on a quarterly basis avoiding the need for expensive, multi-year upgrade projects which have occupied significant State time and resources in the past. The State will receive new code updates, patch sets, additional features and new functionality with each quarterly update. New features coming in FY2023 include additional e-procurement functionality, lease and debt functionality, vendor performance analytics and risk metrics, Human Resource Analytics, Reimbursable Service Agreement process enhancements, Accounts Receivable intercept, collection and write-off functions, cost accounting fund source controls and additional robotic process automation.												
The State has made a significant investment in IRIS and, as the system is modernized and tasks are automated, the State will save time and increase efficiencies across all departments. This project will ultimately lead to more accurate accounting and fewer audit findings, resulting in increased accountability and transparency.												
The Department of Fish & Game has distributed this adjustment across the department based on department's cost allocation plan.
